

## You have been tested for COVID-19 or You have been exposed to someone with COVID-19

CCH is here to help you through the process

### Here are your next steps:

1. Follow your Medical Provider's instructions for care.
2. If you are discharged home before you get results go directly home and don't leave your home until the doctor who tested you for COVID-19 or their representative calls you with those results and gives you further directions.

### If your COVID-19 test results are POSITIVE:

1. Continue to stay home and isolated from family members as much as possible until you are contacted by your local Public Health.
2. Your local Public Health will call you and provide you with further isolation or quarantine directions.

Call 911 and seek emergency care immediately if you have trouble breathing, persistent pain or pressure in the chest, new confusion, inability to wake or stay awake, and/or bluish lips or face.

When you use My Health Home, you have access to your test results when they are available, unless otherwise noted. Visit [cchwyo.org/mhh](https://cchwyo.org/mhh) to log in.
