- Wellness Panel – \$45**
A total of 32 tests that measure cholesterol, glucose, thyroid, iron, ferritin, electrolytes, minerals, uric acid, triglycerides, and liver and kidney function.
- CBC (complete blood count) – \$25**
A group of tests that evaluate the cells that circulate in blood, including red blood cells (RBCs), white blood cells (WBCs), and platelets (PLTs). The CBC can evaluate your overall health and detect a variety of diseases and conditions, such as infections, anemia and leukemia.
- Iron Panel - \$35**
A reflection of the total amount of Iron stored. Iron, Ferritin, TIBC, UIBC, and Iron Saturation Index.
- Hemoglobin A1C – \$30**
To help screen for diabetes and prediabetes. Gives a 120 day average of glucose levels.
- PSA (prostate specific antigen) – \$30**
Measures a protein produced by the male prostate gland. Recommended by the American Cancer Society for men age 45 - 50.
- Thyroid Function Panel – \$40**
Measures T-3, T-4 and TSH.
- Thyroid Antibodies (Thyroperoxidase & Thyroglobulin) – \$40**
Used for screening when there is an enlarged thyroid or other thyroid tests have indicated a possible dysfunction.
- Vitamin D – \$40**
A fat-soluble vitamin that helps control calcium and phosphate levels in the body, critical for growth of bones and teeth.
- Vitamin B12 & Folate – \$35**
Indicates possible deficiencies, anemias, and malnutrition or malabsorption.
- Nicotine Screening – \$40 (Sent to Mayo)**
- Blood Typing – \$35**
Determine your blood type: O+, O-, A+, A-, B+, B-, AB+, AB-.
- iFOBT (Fecal Occult Blood Test) – \$25**
A sample of stool tested for hidden blood indicating colon disorders, including colon cancer. A return envelope is provided to mail to the CCMH Laboratory at the Hospital.
- FSH (Follicle Stimulating Hormone) – \$40**
Often used in conjunction with other tests in the work-up of infertility disorders in both men and women.
- Estradiol – \$40**
A form of estrogen in the blood to evaluate reproductive health. Hormone imbalances and sexual development for both male and female.
- Progesterone – \$40**
A vital precursor hormone for both men and women that regulates mood, supports bones health, and maintains the essential balance between estrogen and testosterone.
- Total Testosterone – \$40**
In conjunction with other tests, testosterone is often used in the work-up of a variety of conditions in men, women, boys and girls.
- Hepatitis C antibody – \$50 (Sent to Mayo)**
Indicates presence of a Hepatitis C.
- HIV – \$30**
Indicates presence of HIV antibodies or antigen. CCMH is obligated by law to report positive results to the State of Wyoming Health Department.
- Covid Antibody Screening – \$75 (Sent to Mayo)**
Indicates presence of antibodies to Covid 19 either through active infection or immunization.
- C-reactive protein - \$25**
A biomarker of inflammation. Serum CRP concentrations increase rapidly in response to tissue injury or inflammation.
- Fasting Insulin Test - \$40**
A fasting insulin test measures the amount of insulin in your blood after 8–12 hours of not eating. It detects early signs of insulin resistance, metabolic syndrome, or prediabetes years before blood sugar levels spike, and helps find the cause of low blood sugar.
- Pregnancy Test (HCG Serum) - \$30**
Verifies if you are pregnant.
- Hepatitis B Antigen - \$40**
Hepatitis B Surface Antigen
Diagnosis of acute or chronic hepatitis B.
- Hepatitis B Antibody – \$40**
Diagnosis of Hepatitis B Virus infection or determining adequate immunity from the Hepatitis B Vaccination series.

When you use MyChart, you have results in less than 24 hours, unless otherwise noted.
