- ☐ **Wellness Panel – \$40**
A total of 32 tests that measure cholesterol, glucose, thyroid, iron, ferritin, electrolytes, minerals, uric acid, triglycerides, and liver and kidney function.
- ☐ **CBC (complete blood count) – \$25**
A group of tests that evaluate the cells that circulate in blood, including red blood cells (RBCs), white blood cells (WBCs), and platelets (PLTs). The CBC can evaluate your overall health and detect a variety of diseases and conditions, such as infections, anemia and leukemia.
- ☐ **Hemoglobin A1C – \$30**
To help screen for diabetes and prediabetes. Gives a 120 day average of glucose levels.
- ☐ **PSA (prostate specific antigen) – \$30**
Measures a protein produced by the male prostate gland. Recommended by the American Cancer Society for men over the age of 50.
- ☐ **Thyroid Function Panel – \$40**
Measures T-3, T-4 and TSH.
- ☐ **Thyroid Antibodies (Thyroxine Peroxidase & Thyroglobulin) – \$40**
Used for screening when there is an enlarged thyroid or other thyroid tests have indicated a possible dysfunction.
- ☐ **Vitamin D – \$40**
A fat-soluble vitamin that helps control calcium and phosphate levels in the body, critical for growth of bones and teeth.
- ☐ **Vitamin B12 & Folate – \$35**
Indicates possible deficiencies, anemias, and malnutrition or malabsorption.
- ☐ **iFOBT (Fecal Occult Blood Test) – \$25**
A sample of stool tested for hidden blood indicating colon disorders, including colon cancer. A return envelope is provided to mail to the CCMH Laboratory at the Hospital.
- ☐ **Iron Panel - \$35**
A reflection of the total amount of Iron stored. Iron, Ferritin, TIBC, UIBC, and Iron Saturation Index.
- ☐ **FSH (Follicle Stimulating Hormone) – \$40**
Often used in conjunction with other tests in the work-up of infertility or when a woman's menstrual cycle has stopped or becomes irregular.
- ☐ **Estradiol – \$40**
Estradiol levels are used in evaluating ovarian function.
- ☐ **Progesterone – \$40**
Helps track ovulation, used in conjunction with other tests in the work-up of infertility and supports gestation.
- ☐ **Total Testosterone – \$40**
In conjunction with other tests, testosterone is often used in the work-up of a variety of conditions in men, women, boys and girls.
- ☐ **Hepatitis C antibody – \$50 (Sent to Mayo)**
Indicates presence of a Hepatitis C.
- ☐ **HIV – \$30**
Indicates presence of HIV antibodies or antigen. CCMH is obligated by law to report positive results to the State of Wyoming Health Department.
- ☐ **Covid Antibody Screening – \$75 (Sent to Mayo)**
Indicates presence of antibodies to Covid 19 either through active infection or immunization.
- ☐ **C-reactive protein - \$25**
A biomarker of inflammation. Serum CRP concentrations increase rapidly in response to tissue injury or inflammation.

When you use MyChart, you have results in less than 24 hours, unless otherwise noted.
